DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 24 (in part), 25-34, 36-38, drawn to compounds and complexes of formula II, and a method of using the same (a diagnostic imaging agent).

Group II, claim(s) 35, drawn to a method of using (treating a patient with a radiotherapeutic agent) compounds of formula II.

Group III, claim(s) 39, drawn to a method of making a polyazamacrocyclic compound bound to a linker.

- 2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Zimova et al. (*Czechoslovak Journal of Physics*, January 2003, *53*, pages A803-808, cited in IDS). Compound P2 anticipates compounds of formula II because R6 is CH₂PO₃H₂, and variable R, R₃, and R₉ are each CO₂H.
- 3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1624

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Zimova et al. (*Czechoslovak Journal of Physics*, January 2003, *53*, pages A803-808, cited in IDS). Compound P2 anticipates compounds of formula II because R6 is CH₂PO₃H₂, and variable R, R₃, and R₉ are each CO₂H.
- 5. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are drawn to different methods. In group I, the method is imaging. In group II, the method is administration to a patient. In group III, the method is a process of making a compound that is not encompassed by group I.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NOBLE JARRELL whose telephone number is (571)272-9077. The examiner can normally be reached on M-F 7:30 A.M - 6:00 P.M. EST.

Application/Control Number: 10/584,430 Page 4
